SUMMARY

Aspiring Data Scientist with experience in statistical modeling, data analysis, and machine learning. Proven ability to extract insights from complex datasets and communicate findings through effective visualizations. Seeking an internship or entry-level data analyst position where I can apply technical skills and analytical mindset to solve business problems.

TECHNICAL SKILLS

Data Analysis: R (tidyverse, modelr), Python (pandas, numpy, scikit-learn), Statistical Modeling, Data Visualization
Programming Languages: Python, R, C#, C/C++, JavaScript, HTML/CSS
Machine Learning: Computer Vision, Pose Estimation, Real-time Object Detection, Regression Models
Frameworks & Libraries: OpenCV, YOLOv8, React, Flask, Unity
Cloud & Tools: AWS (DynamoDB, Cognito, Lambda), Git, R Studio, VS Code, Google Cloud Platform

PROJECTS

- COVID-19 Mortality Predictor** | *R, tidyverse, modelr, ggplot2* Jan 2024 – May 2024
- Engineered predictive linear regression models achieving 87% accuracy in forecasting COVID-19 mortality rates
 - Analyzed and processed large-scale healthcare datasets (50,000+ records) using R and statistical techniques
 - Developed interactive visualizations identifying key correlations between mortality rates and demographic factors
 - Optimized model performance through statistical evaluation metrics (RMSE, R-squared) and cross-validation
- MOFIT (Motion Oriented Fitness Improvement Tracker)** | *C#, Unity, OpenCV, AWS* Jan. 2024 – Dec 2024
- Engineered AI-powered fitness application using YOLOv8 for real-time pose estimation and movement analysis
 - Implemented machine learning models to analyze 30+ exercise patterns, providing instant feedback on form
 - Architected AWS backend infrastructure using DynamoDB for user data storage and analytics
 - Developed comprehensive data pipeline for collecting and analyzing user performance metrics
- Peggle-Style Unity Game** | *C#, Unity, Git* May 2024 – Present
- Developed physics-based gameplay mechanics with data-driven design principles for balanced gameplay
 - Implemented analytical tracking systems for game metrics and player performance statistics
 - Created dashboard for monitoring gameplay patterns and user engagement metrics

EXPERIENCE

- Computer Science Student Researcher** Aug 2022 – Present
California State University Fullerton Fullerton, CA
- Conducted statistical analysis on COVID-19 datasets using R to identify mortality predictors across demographics
 - Developed efficient data processing pipelines using tidyverse and modelr libraries, handling 100,000+ data points
 - Created interactive visualizations to communicate statistical findings to interdisciplinary research teams
 - Collaborated with faculty on research publications, contributing data analysis and interpretation
- Independent Data Analytics Project** May 2024 – Present
Personal Project Remote
- Designing and implementing data collection mechanisms for gameplay analytics using C# and Unity
 - Analyzing user interaction patterns to optimize engagement through data-driven decision making
 - Managing full analytics pipeline from raw data collection to actionable insights

EDUCATION

- California State University Fullerton** Fullerton, CA
Bachelor's Degree in Computer Science - GPA: 3.51 Aug. 2022 – Jan 2025
- Rio Hondo College** Whittier, CA
Associate of Science in Science and Mathematics & Social Science Aug. 2017 – Dec 2021
